

Story

One day our daughter will ask us, "Mom, dad, where was I on my first Christmas?"

You spent your first Christmas with your sister, mom and dad at the HUG's pediatric intensive care division."

On November 28, 2019, our youngest daughter was having trouble breathing. Doctors diagnosed her with severe bronchiolitis. It was the beginning of a long and challenging experience within the HUG hospital in Geneva and the CHUV in Lausanne.

Therefore, we created this association to pay tribute to our daughter, to her perseverance, courage, and fight for her life as well as other kids in hospital.

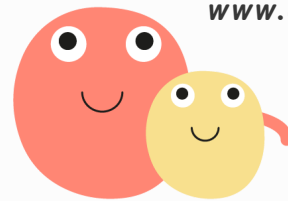

We want to contribute in a positive and concrete way to improve the daily life of sick children, their families and nursing staff.

LET'S BE NEXT TO THEM

Let us brighten up the daily lives of sick children in hospital, their families and nursing staff.

Check out our ambitious and concrete projects!

Mission

À Côté de Toi aims to help children and their families in need, but also the caring nursing staff in the intensive care unit in Geneva.

By improving the quality of life of the children, we have a positive impact on the well-being of all involved. We address their needs and bring them comfort, joy and serenity.
